	Examiner Tuan H. Nguyen	Art Unit 2813	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 8, "may" is indefinite since it is unclear as to whether the area of an upper layer among the collector layer, the base layer and the emitter layer become smaller or not.

Claim 12 is confusing, it is unclear what is relationship between the transmitter, receiver, amplifier and the HBT.

Claims 2-11 are indefinite since they are not positively recited the process steps.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimura et al.'169 (cited by applicant).

Shimura et al., particularly figs. 1-4 and related text on col. 17-19 discloses the claimed method for forming a HBT including a laminated collector 32, base 31 and

emitter 30 on top surface of a semiconductor substrate 26; patterning the collector layer, base layer and emitter layer so that an area of an upper layer become smaller; forming collector electrode 23, base electrode 22, emitter electrode 21 on each surface portions of the collector, base emitter layers (fig. 3, paragraph bridging col. 17-18); forming a first via hole 25a which extends through the emitter, base and collector layers and ends at the specified depth in the substrate 26 (fig. 4a-4b); forming a metal wiring which extends from the surface of the emitter electrode 21 to within the first via hole so as to reach a bottom portion of the first via hole (fig. 4d, col. 18, fifth paragraph); polishing rear surface side of the substrate up to bottom portion of the first via hole; and providing a heat sink layer 27 made of a metal on the polished rear surface of the substrate so that the heat sink layer 27 makes contact with the metal wiring 37, 38 within the first via hole (fig. 4e, col. 18, next to last paragraph).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Freeman et al., Adlerstein et al., and Honjo are cited as of interest.
